Mr. Fawzi Nass
Director

Mr. Adrian Cockrem
General Manager

Our Mission

”The Management Team, with the Co-operation of all employees, is committed to achieve one goal and mission – that is to meet the needs of each customer and ensure consistent and superior service. Gulf City Cleaning will continue to work hard to make a positive difference to the communities we serve and to the Environment of Bahrain”

About Us

It is GULF CITY CLEANING COMPANY W.L.L's pleasure to introduce itself as a pioneering service provider in the field of cleaning and waste disposal services such as solid and liquid waste. GCCC provides services on a contract basis to private and public sectors throughout the Kingdom Of Bahrain. GCCC was formed in 2000 following the successful award of the Tender for Collection of Waste, Street Sweeping and Septic Tank Emptying in the Municipalities of Manama (The Capital City) Muharraq and Hidd. This was one of the first full "turnkey" privatisation in the GCC Countries and has proved very successful. We also have

several other contracts and work extensively around Bahrain, with some Joint Ventures about to take place in other GCC countries. Having just finished more than a decade of success, GCCC is now consolidating and growing steadily, continually evolving as a major market player in cleaning and waste management services.

GULF CITY CLEANING is part of Nass - The Group who have been successfully trading in Bahrain since 1964.

Nass – The Group is one of the largest companies in Bahrain with over 9,000 employees.

Our Policies

Gulf City Cleaning Company (GCCC) is a leading waste management company based in the Kingdom of Bahrain and is committed to achieving customer satisfaction.

To achieve this, GCCC has developed, implemented and maintains an Integrated Management System (IMS) meeting the requirements of ISO 14001:2004, OHSAS 18001:2007 & ISO 9001:2008 for Environmental Management that ensures:

- Continual improvement of the effectiveness of the IMS;
- Compliance with applicable statutory, regulatory and other requirements;
- Reduction of the consumption of energy resources;
- Where practicable, the reduction, recycling, or reusing of waste;
- The safe disposal of hazardous waste;
- Any harmful emissions to the environment are minimized;
- Prevention of injury and ill health.

Quality, Environmental and Safety Objectives are established, implemented and monitored to ensure this policy is implemented effectively.

GCCC ensures communication of this policy to internal and external interested parties seeking their support in implementing this policy to promote Quality, Environmental and Occupational Health and Safety performance.

Established Objectives

Our Training Procedures

All Training, Safety and Maintenance is overseen, and regularly adapted and updated by Mr. James MacDonald, Transport and Maintenance Manager.

Providing a 24 hours service to our clients requires us to employ highly qualified professional staff, modern vehicles and specialist items of plant.

Our vehicles and plant are maintained in our modern 11-bay, fully equipped workshop. All maintenance, repairs, painting and welding are undertaken in our workshop with cost monitored by our computerised vehicle management system (Tranman).

- All drivers of specialist equipment are trained by our Driver Training Manager and continually assessed
- All training records are recorded on our Fleet Management Programme
- All Mechanics, Tyre Fitters etc have training with suppliers and manufacturers.
- GCCC has a bonus system which encourages the correct use and maintenance of its vehicles
- All accidents are recorded on the Fleet Management Programme, fully investigated and costed; any training requirements are also addressed.

Our Fleet

This picture shows our Yard at Mina Salman Industrial Estate where vehicles are parked after work and all washed.

This is one of six of our Johnston CN200 sweepers. These are very versatile.

This is the backbone of our waste collection fleet we now have 33 of these Nissan 6x4 chassis.

This is one of our most versatile vehicles a large Nissan 6x4 truck fitted with a Palfinger crane.

This is an example of our fleet of waste water vacuum tankers. These vehicles remove waste for disposal at Tubli Plant.

This is an example of our fleet of tipping six wheels. These are utilised to remove loose, bulky garden waste.

This is an example of our Skid Steer loaders. They are very versatile units used for open land clearance.

GCCC also has a fleet of Mitsubishi Rosa buses, which are used for labour transport on our Municipal contracts.

Modern Equipment

Specialised Service

In order to provide 24 hour service to its clients, GCCC acquired top calibre professionals, modern vehicles and equipment, which are maintained professionally. All our fleet is fitted with a GPS system. With this real-time information at their fingertips, managers can make quick and efficient decisions that result in improved business operations and helps to cut down fuel consumption, time loss and overtime costs. Further, this turns out to be a value addition to our business by improving the level of efficiency and quality of service we can provide to win customer satisfaction.

This is one of our fleet of Skip Loader trucks with skip on board. 7.5 cu m skips are available to hire.

This is one of six of our Johnston 650 sweepers. These are very versatile and can be utilised to sweep any roads, car parks open areas.

This is a recent addition to our fleet from June 2010. We use it to clean and groom beaches on one of our contracts.

In December 2010 GCCC was awarded a 4 year contract for track cleaning services at BIC. This contract required 2 specialist machines from Beam in Denmark.

This is one of our two Nissan Trucks 6x4 fitted with Palfinger hook loading system. shown with a Large 18 cubic meter static compactor.

In our waste collection fleet, we now have 6 of these Nissan 4x2 chassis, used in narrow area, such as souques etc.

This is a compact washer from Beam in Denmark. It high pressure washes & vacuums paved areas used on our contract at Bahrain International Circuit.

This is one of our seven loading shovels mainly used for open land clearance. All loose rubbish is moved in tippers to the landfill site at Asker.

Our Clients

بلدية المنامة

بلدية المحرق
Muharraq Municipality

Manama and Muharraq Municipalities

Those are our main clients with whom we have been working for over 9 years. Gulf City Cleaning first won the contract in 2001 and we have again, in open competition, for 5 years in November 2008. We are proud to work with these clients, having made a success of one of the first privatisations in the middle east region for such services.

Seef Mall

Seef Properties have been our clients since 2002 we now provide 4 no. 10m³ static compactors which are removed daily from the Seef Mall Shopping Centre. The compactors provide an efficient and clean method of removal of commercial waste for one of the premier shopping malls in the Kingdom of Bahrain.

Durrat Al Bahrain

Gulf City Cleaning has now completed 3 years of our contract with the Facilities Management Company at the Kingdoms most prestigious development. We are responsible for facilities cleaning, domestic waste collection and general road cleaning. We have now successfully obtained a further 3 year contract.

Building Partnerships

Providing Solutions

Bahrain City Centre

There we have provided 4 no. 18m³ static compactor for the daily removal of waste from the busy shopping centre. We are also involved in the cleaning of grease traps and drains of the waste management. Recently we have assisted in the introduction of recycling of waste at the centre which although still in its early steps is proving successful.

Bahrain International Circuit

We have been the sole suppliers of Waste Management, Housekeeping and Cleaning Services at the Middle East First F1 Circuit since the beginning. After winning 2 further contracts, we have supplied a specialist machine for track cleaning for 4 years from December 2010.

Ministry of Interior

We have recently been awarded a contract for the cleaning of drains and grease traps with the Ministry of Interior.

Our Public Relations

Part of our contract with Manama and Muharraq Municipalities, requires Gulf City Cleaning to undertake a number of Public Relations Campaigns to promote awareness of the need for responsible behaviour towards the Governorates of Manama and Muharraq.

We have appointed a full-time Public Relations Executive whose task is to work with the Municipalities to create an ongoing campaign to raise awareness about waste issues and responsible behaviour towards the environment. Several events have been held and others are planned.

- G Open Land Clearance
- H Oil Spill Removal
- I Hazardous Waste Transport

We can help with all types of drain cleaning/maintenance, with high pressure washing and drain jetting also available.

Leading Provider

Tailor-made Service

Domestic Collection

As part of our contractual requirements we service the population of Manama, Muharraq and Hidd daily - 7 days per week, 365 days per year. At present our fleet of 45+ refuse collection vehicles collects 520 tonnes of domestic refuse per day delivering this to the landfill site some 22 Km from the contract area. We have containerised our areas with 1100 - litre bins. We also collect the following categories of waste:

Building waste - 220 tons/day
Commercial waste - 60 tons/day
Garden Waste - 30 tons/day
Bulky Household waste - 45 tons /day.

Commercial Collection

Our commercial customers are serviced either on a regular, daily basis, or as required upon request. Containers are provided after consultation with the customer and range from, 240 - litre containers, 1,100 litre containers, open or closed skips and Static Compactors which we supply on an all-in rental basis.

Mechanical Sweeping

Our fleet of modern mechanical sweepers, in addition to working in our contract area, are hired out on an hourly or daily basis to provide a cost effective solution to cleaning any areas.

Waste Water Collection

Many of our customers also avail themselves of our waste water collection tankers for collection and disposal of sewage and waste water.

Skip Services

We provide an on demand skip collection service for collection of approved industrial waste and builder's rubble.

Static Compactors

These are provided and maintained for shopping malls and other similar establishments where large amounts of bulky packaging need to be removed cost-effectively and hygienically.

Open Land Clearance

On average, we remove and dispose of some 8,000 tonnes of builder's waste and illegal tipping per month as part of our contractual obligations. We also provide this service for private customers.

Oil Spill Removal

During June and July 2003, GCCC worked on a special project with the Ministry on removal and cleaning following an oil spillage. 1,600 tonnes of contaminated sand and oil were removed by GCCC for safe disposal.

Hazardous Waste Transport

We are authorised by the Government to transport, in certain specialised vehicles, hazardous waste to approved sites in Bahrain, GCCC can arrange for collection and transport of most hazardous solid wastes.
